Use-Case Specification: Show Tour on First Start

1. Use-Case “Show Tour on First Start”

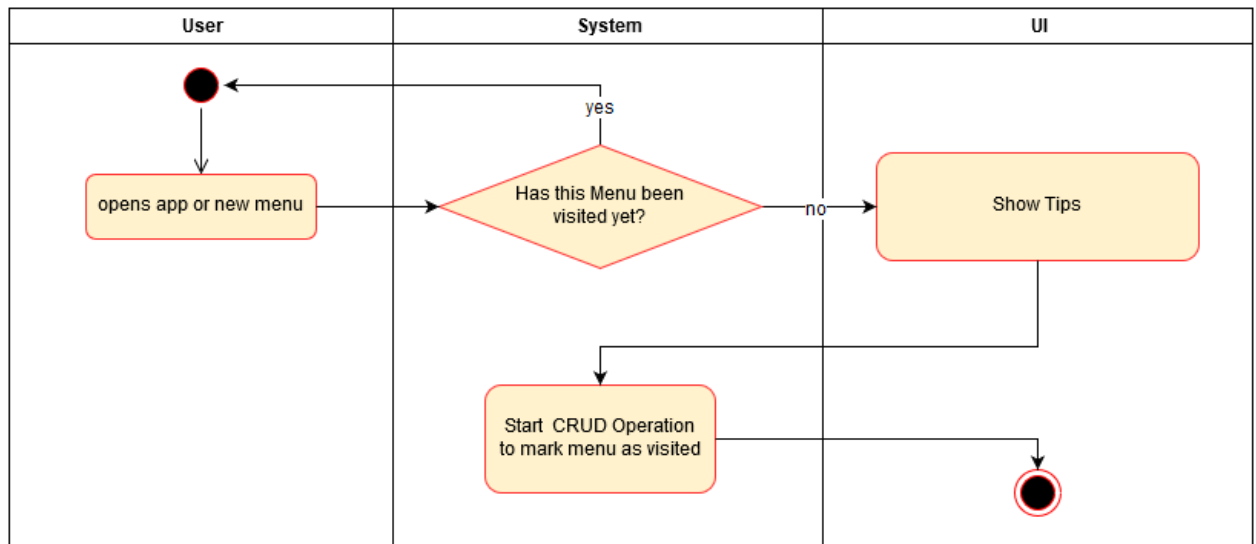

1.1 Brief Description

This Use Case defines how the user of the application is guided through the app itself when it is first started..

For each Activity, there will be shown a brief description of what the respective Activity allows the user to do. This will be shown only once.

2. Flow of Events

2.1 Basic Flow

Mockup:

3. Preconditions

3.1 Functionality on Android

Since the app is designed as an Android application it is necessary for the UI to be responsive to different screen sizes.

4. Postconditions

None

5. Extension Points
